De-Stress™

Why you may need De-Stress™: Stress and anxiety have become common side-effects of modern day living, and are especially prevalent during the holiday season. **De-Stress™** is a patented, all natural, specially produced milk protein hydrolysate, concentrating a specific decapeptide that demonstrates significant anxiolytic [used to relieve anxiety and reduce tension and irritability] activity, as evidenced by several double-blind, placebo controlled human trials. Additionally, the **De-Stress™** natural decapeptide has been tested for three major side effects generally attributed to benzodiazepines (drugs used for anxiety management); dependence, memory loss and tolerance.

Why your healthcare practitioner recommends De-Stress™: **De-Stress™** has been shown to be safe and effective, with the only known negative side-effect being a potential allergy in individuals highly sensitive to dairy as it is derived from milk. Reduce your stress and anxiety with **De-Stress™**, another fine example of leading-edge nutritional supplements from Biotics Research Corporation, bringing you "The Best of Science and Nature".

Supplement Facts

Serving Size: 1 Capsule

	Amount Per Serving	% Daily Value
De-Stress™ hydrolysate † (as hydrolyzed casein concentrate)	150 mg	*

* Daily Value not established

Other ingredients: Gelatin and water.

Contains ingredients derived from milk.

† De-Stress™ supplies a decapeptide, as determined by its amino acid sequence, having anxiolytic activity. This statement has not been evaluated by the U.S. Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Patent # 5,846,939

RECOMMENDATION: One (1) capsule as a dietary supplement or as otherwise directed by a healthcare professional. **De-Stress™** can be taken during the day at time of intense stress or before bedtime.

KEEP OUT OF REACH OF CHILDREN

Store in a cool, dry area.
Sealed with an imprinted safety seal for your protection.

NDC #55146-07707 Rev. 7/10
